CleanStation® SRS XL
The Right Choice in Support Removal

CleanStation®
PATENT PENDING

CleanStation® SRS XL™

jet-action™ cleaning

Engineered and built to precise specifications for the Stratasys® product line, the UL & CE approved CleanStation® provides an optimum cleaning environment for your water-soluble support system.

The secret to the success of the patent-pending CleanStation® is the jet-action™ cleaning power that penetrates and removes soluble support material from your FDM® parts. Comprehensive testing has established its unparalleled effectiveness. The CleanStation® is **fast, efficient, and easy to use** – a complete solution for your WaterWorks™ system.

The CleanStation® SRS XL™ has an enormous tank size of 24" x 24" x 22" to clean very large parts or large quantities of parts. The self-contained unit is portable and offers quick hook up to standard plumbing. The system is fully automated with a digital timer and temperature controller as well as valves to fill and drain the tank. The CleanStation® SRS II™ has the added benefit of a sink along side the cleaning system for parts rinsing and hand washing. This provides a cost-effective alternative to remodeling company facilities. The CleanStation® tank also safely contains the cleaning solution, helping to maintain a sanitary work environment.

Realize a return on your initial investment in less than a year. Reliability and a fast, efficient cleaning process makes CleanStation® the choice that pays for itself.
